PROFESSIONAL SUMMARY

Software & Data Engineer with hands-on experience architecting cloud-native data platforms on GCP and Databricks — engineering Medallion Architecture (Bronze/Silver/Gold) pipelines on Delta Lake that process 500M+ records/day, and re-engineering PySpark workloads, Star Schema models, SCD Type 2, and CDC pipelines to cut ETL runtime 25% and lift BigQuery/Snowflake query performance 30%. Experienced in applying Gemini, Generative AI, and prompt engineering to automate workflows and accelerate development. 4x award-winning Software Engineer, on-site at Google via GlobalLogic, recognized for technical excellence and delivery. Currently seeking new Data Engineer / Software Engineer opportunities.

TECHNICAL SKILLS

Languages: Python, SQL, Java

Data Engineering & Orchestration: ETL Pipeline Design, Databricks, PySpark, Medallion Architecture, Star Schema Modeling

Cloud & GCP: Google Cloud Platform (GCP), Dataproc, Cloud Storage, BigQuery, Delta Lake, Google Cloud Data Fusion

Databases: MySQL, SQL Server, Snowflake

Applied AI: Gemini, Generative AI, LLMs, Prompt Engineering, RAG, Agentic AI, LangChain, Knowledge Graphs, Search AI

Tools & DevOps: Git, GitHub, CI/CD, Docker, Kubernetes, Pentaho (PDI), Power BI, REST APIs, Web Scraping & Automation

WORK EXPERIENCE

Software Engineer | GlobalLogic (Client: Google)

Gurugram, Haryana | Oct 2025 – Sep 2026

- Architected end-to-end Medallion Architecture (Bronze/Silver/Gold) pipelines on Databricks and GCP using PySpark, Delta Lake, and BigQuery, processing 500M+ records/day.
- Cut ETL processing time ~25% and improved data validation accuracy by orchestrating and optimizing 10+ production pipelines in Python and SQL.
- Implemented error handling, logging, and alerting across 10+ orchestration and PySpark pipelines, improving SLA compliance and reliability.
- Optimized Star Schema models in BigQuery, lifting BI query performance 30% and accelerating Looker Studio dashboard refresh rates.
- Built and deployed web scraping/data crawling solutions across 100+ sources; migrated 5+ legacy Java codebases to Python.
- Leveraged Gemini and Generative AI with prompt engineering to automate content analysis, data validation, and documentation across 5-6 daily pipelines — cutting manual review and documentation effort.

Analyst | GlobalLogic (Promoted from Associate Analyst)

Gurugram, Haryana | Sep 2023 – Sep 2025

- Analyzed and validated large-scale datasets powering Search AI and Knowledge Graph systems, laying the data foundation for later ETL workflows.
- Automated repetitive data validation and structured-extraction workflows in Python across 100+ websites, reducing manual data-collection effort.
- Built and maintained Pentaho (PDI) ETL workflows to clean, transform, and load source data — the foundation later scaled into the Medallion pipelines architected as Software Engineer.
- Streamlined data quality review processes using Pentaho (PDI) and SQL, cutting manual review effort ~30%.

PROJECTS

E-Commerce Sales Analytics Pipeline

Python, SQL, PySpark, Snowflake, Power BI

- Engineered an end-to-end ETL pipeline ingesting, cleaning, transforming, and loading large-scale e-commerce sales data into Snowflake, cutting processing time ~40%.
- Built automated data-validation and exception-handling workflows with Power BI dashboards tracking revenue, customer segmentation, and sales KPIs.
- Integrated Gemini AI to automate data-quality checks and schema validation on ETL outputs; applied prompt engineering with Generative AI to auto-generate SQL queries and technical documentation, reducing manual documentation effort.

Smart Attendance Management System

Python, Flask

- Built a facial recognition-based attendance system with photo-based user identification, automating tracking and reporting.
- Developed an administrative dashboard for monitoring, report generation, and user management.

EDUCATION

Bachelor of Computer Application (BCA)

Dr. VSICS, Kanpur, UP | 2020 – 2023

Relevant Coursework: Database Management Systems, Data Structures, Operating Systems

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Certified – Professional Cloud Architect
- Google Cloud Certified – Associate Cloud Engineer
- Microsoft Certified – GitHub Foundations
- 2x Monthly Reward & Recognition Award Winner at GlobalLogic — recognized for technical excellence and delivery.
- 2x On-the-Spot Award Winner at GlobalLogic — recognized for technical excellence and delivery.
